

# SNAPCAGE™ BUNKER USER GUIDE

**Congratulations for owning a snapcage™ bunker!**

**The snapcage™ bunker is a unique companion product of personal paintball field - snapcage™, featuring:**

1. Made from heavy gauge PVC fabric – 20 mil thickness PVC;
2. Testing proof against consistent and repeated shooting – tested by using reusable and paintless paintball – Mighty Ball™;
3. Water weight base, no tie down, no bungee needed;
4. Fully printed graphic skin;
5. Perfect for snapcage™ and snapmaze™ use; Also suitable for home backyard field;

**Inflate and use the snapcage™ bunker:**

1. If you use the snapcage™ bunker in outdoor environment other than in the snapcage™, check the location where you will put the bunker to make sure there are no sharp items, which may damage the bunker;
2. Fill the water base before you inflate the bunker. The water base cap locates at the bottom of the bunker;
3. Move the bunker filled with water base to the location where you like to set it and inflate the bunker;
4. Use air mattress inflator or similar inflator to inflate the bunker. Do NOT use air compressor or any other high pressure inflators;
5. Do NOT over inflate the bunker. Bunker is fully inflated already when the shape is full and you can still

push in 4-6 inches. Over inflation will damage the products;

6. Do NOT leave the bunker under the sun. The heat will increase the pressure of the bunker and break the seam. Check the bunkers from time to time to ensure an appropriate pressure level. If the bunker is full blown and feels hard when pushed, open the air valve to release some air out to lower the pressure inside the bunker.

**Deflate the snapcage™ bunker:**

1. If you are using real paintballs instead of our reusable, paintless Mighty Ball™, make sure you clean the paint before you deflate the bunker;
2. Release the water out from the base by opening the water cap from the bottom of the bunker;
3. Release the air out of the bunker by opening the air valve;

**Repair the snapcage™ bunker:**

1. If there is a small hole on the bunker, you can use the repair kit included with the bunker to do the repairing as follows:
2. Clean the surface around the hole and make sure the surface is dry and free from oil;
3. Cut a patch piece bigger than the hole;
4. Apply the repair glue on the patch piece and around the hole;
5. Wait until the glue is sticky and then apply the patch on the hole and pressure tightly.

**Clean and store the snapcage™ bunker:**

1. Use water and mild detergent to clean the surface of bunkers;
2. Let the bunker totally air dry;

3. Store the bunker in room temperature with good ventilation.

**DO NOT...**

1. Do not setup the snapcage™ bunker near open fire and heat resources;
2. Do not pull and drag the snapcage™ bunker on ground, especially on ground and rough surface ground;
3. Do not use heating, lighting or cooking equipment with open flames in or near the snapcage™ bunker;
4. Do not spray the snapcage™ bunker with insecticide and other chemicals;
5. Do not leave the snapcage™ bunker in high wind or hot sun.

**DO....**

1. Always use your Mask while playing paintball games;
2. Always put your barrel cover on after finishing paintball games.
4. Always use adult supervision.

DO NOT LEAVE YOUR SNAPCAGE™ BUNKER IN DIRECT SUNLIGHT LONGER THAN NECESSARY. The sun's ultraviolet (UV) light degrades almost every fabric and material. While the fabric has protection for (UV) light, if left in sunlight for prolonged periods of time, will fade and weaken. Also hot sunlight will increase the internal pressure and causes over inflation, which may break the seam. UV Damage and beam busting by over inflation are not covered by the manufacture's warranty.

**Warranty and Replacement Parts**

The snapcage™ bunker comes with 90 days limited warranty. If you have questions or need to order a part, call 1-888-SNAPCAGE or visit our website at [www.snapcage.com](http://www.snapcage.com)
